Hyderabad, India

SUMMARY

B.E. (Data Science) student at MVSR Engineering College building Python data and LLM-powered applications. Interested in AI/ML, AI agents, explainable AI and open-source software.

EDUCATION

Maturi Venkata Subbarao Engineering College (MVSR), Hyderabad — Expected 2028
B.E., Computer Science & Engineering (Data Science) · CGPA 9.1/10

TECHNICAL SKILLS

Languages: Python, C
Data / ML: Pandas, NumPy, Matplotlib, scikit-learn, Google Teachable Machine, Jupyter
Apps / APIs: Streamlit, FastAPI, REST/JSON, Groq LLM API, NewsData.io API
Tools: Git, GitHub, GeoPandas (basic), Kaggle

PROJECTS

News Navigator AI | *Team project · Python, FastAPI, Streamlit, Groq LLM · live app*

- Co-developed a website that combines information from multiple news articles into brief summary points, saving readers time: a Streamlit UI sends a topic to a FastAPI endpoint, which retrieves news articles and prompts an LLM (Groq, Llama 3.1) for a summary, key points, differing perspectives and follow-up questions.
- Wrote an impact model comparing manual reading with AI briefing (assumption-based estimate; not yet measured with users).

Student Attention Classification | *Google Teachable Machine*

- Trained an image classifier (reading vs. phone use) in Teachable Machine on 350+ self-collected labelled images; reached about 60% accuracy.
- Traced the weak result to blurred, filtered and unclear training images and to dataset bias; next step is cleaner data and learning the underlying ML concepts.

Timetable Generator (live demo) | *Python, Pandas, Streamlit*

- Built and deployed a Streamlit web app that generates timetables from scheduling rules using Pandas (hackathon project).

OPEN SOURCE

Open Source — gwlearn (PySAL) & StingrayExplorer (OpenAstronomy)

- Opened PR #45 to gwlearn (PySAL): an adapter so geographically weighted estimators work with scikit-learn GridSearchCV via metadata routing; wrote a demo script and a blog post on the work; commented on another contributor's PR.
- Submitted PR #1 to StingrayExplorer: fixed an import-case ModuleNotFoundError and a missing `__init__.py` (closed by maintainer; not merged); documented installation errors for others.
- GSoC 2025 proposal, "Interactive Database for X-ray Observations" (Stingray): ranked #1 on the GSoC dashboard; not selected.

CERTIFICATIONS & PROGRAMS

- **Cloud Virtual Internship** (AICTE–EduSkills, AWS Academy curriculum), 8 weeks, Apr–Jun 2026 — completed
- **Deloitte Australia** Technology Job Simulation — completed · **ISRO** Geospatial Remote Sensing certification
- **Semi-finalist, ET-AI Hackathon 2026** (The Economic Times, May 2026) · **AICTE Virtual Internship**, AI for India 2.0 (shopping-trends data analysis project)

LEADERSHIP & ACTIVITIES

- **NCC** — B Certificate holder
- **AWS Builder Center "Future Builders Connect"** (HITEX, Hyderabad, 17 Sep 2026): hands-on workshop on building AI agents with Amazon Bedrock, plus cloud and agent-prompting activities. Also a participant in an AI/ML mock-interview practice session at MVSR
